

Background and Roles and Responsibilities for Southern Australia Livestock Research Council (SALRC) Regional Committee Members

SALRC's Primary Function

The Southern Australia Livestock Research Council (SALRC) is an independent Incorporated Association and one of three national advisory councils set up to provide recommendations on research and development (R&D) and extension and adoption (E&A) initiatives and investments in the Australian red meat and livestock industries. SALRC provides this function to the beef and sheepmeat industries of south-eastern Australia, while its affiliate councils, the North Australia Beef Research Council (NABRC) and Western Australia Livestock Research Council (WALRC), provide equivalent roles to the northern beef and south-western livestock sectors, respectively.

Operating Structure

SALRC's geographic area is based on seven major red meat and livestock production zones in south-eastern Australia (Appendix 1) including:

- Northern NSW;
- Southern NSW;
- Central and Western NSW & QLD Sheep;
- Central VIC;
- Western VIC;
- South east VIC & TAS; and,
- South Australia.

Each of these zones is supported by a SALRC Regional Committee, comprising commercial livestock producers and processors, grower networks, RD&A providers and other key stakeholders involved in the delivery, extension and adoption of R&D. The Chairs of the seven Regional Committees in-turn make-up the producer representatives on SALRC's Council, sitting alongside senior representatives from major RD&A providers including: Meat and Livestock Australia (MLA), State Departments of Primary Industry (DPIs), CSIRO, Universities, Australian Wool Innovation (AWI), Local Land Services (LLS) and Animal Health Australia (AHA). At this level, SALRC is led by an Independent Chair and Secretariat, and supported by a governance and management Committee.

Relationship with Meat and Livestock Australia

SALRC plays a key role in the consultation and reporting structure used by MLA in determining investments in RD&A and Producer Demonstration Site (PDS) projects. SALRC's Regional

Chairs collectively form the Southern Producer Panel, which provides commercially-relevant context, direction and feedback on RD&A priorities and RD&A proposals seeking MLA funding.

In addition, the Independent Chairs – and one senior producer representative – from SALRC, NABRC and WALRC are members of MLA’s Red Meat Panel. This panel assesses regional RD&A issues in the context of national red meat and livestock industry RD&A priorities, as directed through the Meat Industry Strategic Plan (MISP) and its beef and sheepmeat subsidiary plans (BISP and SISP).

Regional Committee Members – Roles and Responsibilities

Seven regional committees provide grassroots input to SALRC. Membership of each regional committee comprises the regional producer chair and up to six producers of grass-fed beef and/or sheepmeat from a range of agro-climatic zones. SALRC provides these producers a clear avenue for input into setting relevant RD&A priorities, a platform for “testing” new concepts, and a central point to co-ordinate regular, two-way MLA communication activities such as RD&A updates.

Regional committees:

- Meet at least twice per year (up to two days per meeting and/or via tele-conference) . Members are expected to review information prior to regional committee meetings.
- Identify the needs of red meat and livestock producers that may be addressed by RD&A.
- Prioritise the relative importance of regional RD&A needs and potential beneficiaries and benefits.
- Provide a consultative function to SALRC (regional) investors to review and provide feedback on RD&A concepts.
- Assess and advise on the RD&A resources required in the region.
- Report relevant regional trends and priorities to SALRC.
- Champion and support selected MLA and other investor communication activities and where appropriate promote MLA RD&A programs.

At the discretion of each committee, and in consultation with SALSEC, representatives from SALRC’s Investors members (MLA, State Departments, CSIRO, AWI, AHA and Uni’s) join the committee as stakeholder representatives.

Regional Committee Members - Accountabilities

Regional committee members are accountable to their respective Regional Chairs and should be responsive to requests from the SALRC Secretariat (SALSEC).

Regional Committee Members - Knowledge & Experience

Regional committee members will be appointed for terms of up to three years and are eligible to serve two terms. Regional Committee Producer Members must:

- Have a commercial interest in grass-fed beef or sheepmeat production, and be actively engaged with regional and/or local sheepmeat and/or grass-fed beef industry networks and organisations focused on RD&A;
- Demonstrate a good understanding of red meat and livestock industry structures, the role of SALRC, its investors, and sheepmeat and beef production issues in their area;
- Have experience or an interest in communicating program and project outcomes to regional and local groups;
- Be willing to operate as an advocate of agricultural RD&A, and for continuous improvement in the red meat and livestock industries;
- Be capable of building an effective and collegiate approach to addressing a broad range of stakeholders and stakeholder issues; and,
- Demonstrate an ability to work collaboratively as part of a regional team.

The time commitment will be up to four days per year. Sitting fees will be paid and approved expenses reimbursed.

EXPRESSION OF INTEREST

Candidates wishing to submit an expression of interest should clearly nominate their region of interest and address the criteria outlined above (Regional Committee Members - Knowledge & Experience section).
